Susan's BrainWork
tip 10

Greetings,

I hope this finds you warm in cold weather, or, if you are in warm weather, I hope this finds you grateful!

I know, I know, I've said in past Brainworks that I wouldn't bore you about my children, but my birthday is soon so please indulge me one more time, or maybe two. My 10 year old son Ian admires Abraham Lincoln because of his dictionary of quotations. Ian regularly wears a shirt with President Lincoln's picture and a caption that reads "Swagger". This shirt has been worn and washed so many times that the once red shirt is now a lovely shade of pink.

"If I had an hour to chop down a tree, I would spend 45 minutes sharpening my axe."

The quote by Abraham Lincoln was one that Ian recently shared, and my thoughts instantly went to our newest software tool Clean Slate Complete. But, for our purpose, the tree is time wasting computer threats and Clean Slate Complete is your axe. Clean Slate Complete combines the features of Fortres 101 and Clean Slate. Easy to configure and easy to use, Clean Slate Complete gives you control over your Windows computers wherever they reside. This is install and forget endpoint security. Sharpen your axe by installing Clean Slate Complete, take back your time, and take advantage of the complete solution to malicious or accidental destructions of computers.

And as Abraham Lincoln once said, "Whatever you are, be a good one."

Oh, and one more I can't resist sharing: "How many legs does a dog have if you count his tail as a leg?

Four. You can call a tail a leg if you want to, but that doesn't make it a leg."
